WHOLESALE PRICE LIST

for

1933-1934

TERMS OF SALE

TERMS OF PAYMENT—Prices listed here are based on cash payment. Cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of purchase amount; the balance to be payable at time shipments demanded. Shipment may be made C .O. D. for balance when one-fourth of the amount of purchase paid with the order. Be sure to include sufficient amount to cover the postage, if you want shipment made by parcel post.

PACKING CHARGES—Are extra at cost for Specimens (B. & B., Stock) Free of charge for Lining Out Stock.

CAR-LOAD SHIPMENTS—Unusual attractive quotations will be offered on B. & B. stock for carload orders; special discount may be allowed also for B. & B. Stock delivered at our nursery grounds without boxing.

PRICES APPLIED—5 and 50 of same variety and same size at 10 and 100 rates respectively; application for 1,000 rate. No order of lining out stock less than 5 in same variety and same size accepted. All quotation are for immediate acceptance, subject to stock being sold.

GUARANTEE—We guarantee all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

TRANSPORTATION—State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made, using our best judgment. Our responsibility ceases upon delivery to forwarding companies; claims for losses or damages must be made upon the latter.

CLAIM—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of goods.

REMARKS—Prices listed here are for 10 and 100 rates for Lining Out stock and each for Specimens. Attractive low prices for larger quantities on application.

Lining Out Stock listed here by slender type letters.

(C) indicates "from Cutting", (S) Seedling and (G) Grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All Lining Out Stock are in bare-roots understood, unless otherwise mentioned.

SPECIMEN STOCK—Listed by bold type letters. B. & B. means balled and burlapped. For carload orders or for specimen orders delivered at the field without boxing to your truck special prices most attractive will be offered.

We have several thousands of very large sized splendid specimens, but not listed here. Glad to offer you unusual bargain prices upon your request.

NOTICE—The prices listed here may be increased to include any Federal or State Taxes levied upon sales, and any increase in the cost of labor or materials through legislation by any Federal or State agencies.

CONIFERS

CEDRUS DEODRA

	Each	10	100
8-12 inch, 2 yr. T		\$1.00	\$ 8.00
12-18 inch, 2-yr. T		1.50	12.00
18-24 inch, field grown, B&B	\$.50		
2-3 feet, field grown, B&B75		
3-4 feet, field grown, B&B	1.00		

CEDRUS DEODRA PENDULA

8-12 inch, G. TT.	3.00
------------------------	------

CHAMAECYPARIS LAWSONIA AUREA (Golden Lawson Cypress)

A very beautiful golden cypress of the same character as Silver cypress. Pyramidal and compact, young growth being clear shiny golden yellow.

4-6 inch, C. T.90	7.00
6-8 inch, C. T.	1.25	9.00
8-12 inch, C. TT.	1.50	12.00
12-18 inch, G. TT.	1.75	

CHAMAECYPARIS LAWSONIA PENDULA GLAUCA

8-12 inch, C. TT.	1.50	12.00
------------------------	------	-------

CRYPTOMERIA JAPONICA VAR YOSHINO

Much finer leaves and more compact growth than common Cryptomeria Japonica. It grows in symmetrical pyramidal shape and thrives far better.

	Each	10	100
4-6 inch, C90	7.00
8-12 inch, C. TT.		1.50	12.00

CUNNINGHAMIA LANCEOLATA (Chinese Fir)

It closely resembles Araucaria but the foliage are narrower, brighter green and less rigid. It has very much more resisting power against cold than Araucaria; it stands the zero weather! Stately and graceful appearance will be given in both individual and group plantings. This is only variety in fir-like conifer, thrives well in the South. Very vigorous grower.

6-8 inch, C. T.75	6.00
8-12 inch, C. T.	1.00	8.00

CUPRESSUS SEMPERVIRENS PYRAMIDALIS (ROYAL ITALIAN CYPRESS)

We offer here only those propagated by cuttings from typical narrow compact, columnar trees.

6-8 inch, C. T.	1.00	8.00
8-10 inch, C. T.	1.25	10.00
3-4 feet, Field, B. B.	1.00	
4-5 feet, Field, B. B.	1.25	

JUNIPERUS CHINENSIS ALBO-VARIEGATA

Dwarf and very compact growth with numerous creamy white tips and branchlets scattered over the plant. Rather slow grower but exceedingly attractive appearance.

2-4 inch, C. T.65	5.00
4-6 inch, C. T.75	6.00
6-8 inch, C. TT.	1.00	8.00
8-10 inch, G. TTT.	1.25	10.00
12-18 inch, field grown, B&B50	
18-24 inch, field grown, B&B75	
2-3 feet, field grown, B&B	1.00	

JUNIPERUS CHINENSIS FEMINA (J. Japonica Sylvestris)

Loosely pyramidal with uniquely spreading branches. Foliage somewhat feathery. Very hardy; thrives well in South as well as in North.

4-6 inch, C. T.75	6.00
6-8 inch, C. T.	1.00	8.00
8-12 inch, C. TT.	1.20	10.00
12-15 inch, C. TTT.	1.60	14.00
2-3 feet	1.00	
3-4 feet, field, B&B	1.25	

JUNIPERUS CHINENSIS PFITZERIANA (Pfitzer Juniper)

One of the best low growing junipers. Very popular all over the country.

4-6 inch, C. T.55	5.00
6-8 inch, C. T.75	6.00
8-12 inch, C. TT.	1.00	8.00
2-3 feet spread, field, B&B	1.00	
3-4 feet spread, field, B&B	1.25	

JUNIPERUS CHINENSIS PROCUMBENS (Trailing Juniper)

Best known of the prostrate creeping juniper. Dense mat of blue-green foliage. Extremely hardy.

	Each	10	100
4-6 inch, C. T.75	6.00
6-8 inch, C. T.		1.00	8.00
8-10 inch, C. TT.		1.25	10.00
12-18 inch, field, B&B50		
18-24 inch, field, B&B75		
24-30 inch, field, B&B	1.00		

JUNIPERUS CHINENSIS SARGENTI

One of the best newly introduced ornamentals from the Orient by Prof. Sargent. Foliages and twigs are much finer than those of Procumbens. We offer here blue strain.

2-4 inch, C. T.75	6.00
4-6 inch, C. T.	1.00	8.00
6-8 inch, C. TT.	1.25	10.00

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are in uniform of medium broad symmetrical pyramidal shape.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
12-18 inch, C. TT.	1.00	8.00
3-4 feet, field, B&B65	
4-5 feet, field, B&B90	

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
12-18 inch, C. TT.	1.00	8.00
18-24 inch, field, B&B50	
2-3 feet, field, B&B65	
3-4 feet, field, B&B90	

JUNIPERUS COMMUNIS COLUMNALIS STRICTA (Columnar English Juniper)

Our strain is strictly columnar, just like Royal Italian Cypress. Plant in height of 6-7 feet has only 8-10 inches of diameter in its width, without having any shearing. Very compact growth with silvery green foliage. Very hardy and thrives well even in the section where Irish Juniper generally fails to grow. We recommend this variety most highly.

4-6 inch, C. T.85	6.00
6-8 inch, C. T.	1.00	8.00

JUNIPERUS COMMUNIS DEPRESSA (Canadian Juniper)

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
12-18 inch, C. TT.	1.00	8.00
2-3 feet spread, B&B65	
3-4 feet spread, B&B90	

JUNIPERUS COMMUNIS DEPRESSA AUREA **(Golden Canadian Juniper)**

A most beautiful prostrate juniper. The shape and habit are similar to that of green Canadian Juniper, but its brilliant golden color, especially when new growth come forth, gives most distinct appearance of beauty.

	Each	10	100
4-6 inch, C. T.75	5.00
6-8 inch, C. T.		1.00	7.00
8-12 inch, C. TT.		1.25	10.00
15-18 inch spread, B&B40		
18-24 inch spread, B&B60		
2-3 feet spread, B&B	1.00		

JUNIPERUS COMMUNIS DEPRESSA PLUMOSA **(Andorra Juniper)**

A new plant with spreading habit. Dark green foliage in summer turning purplish bronze in winter. A most desirable winter coloring conifer.

2-4 inch, C. T.60	5.00
----------------------	-----	------

JUNIPERUS CONFERTA (Shore Juniper)

A low prostrate juniper with slender, spreading branches. Foliage, willow-green in color. It thrives well on seashore, particularly in sandy soil. However, it grows nicely also in interior.

6-8 inch, C. T.	1.00	8.00
12-18 inch, C. TT.	1.75	15.00
18-24 inch spread, B&B75	
2-3 feet spread, B&B	1.00	
3-4 feet spread, B&B	1.25	

JUNIPERUS EXCELSA STRICTA **(Spiny Greek Juniper)**

Well known dwarf variety in conical shape. Grows rather slow but very hardy.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00
8-10 inch, C. TT.90	7.50
12-18 inch, Field, B&B	1.75	15.00
12-15 inch, field, B&B40	
15-18 inch, field, B&B50	
18-24 inch, field, B&B60	

JUNIPERUS HORIZONTALIS DOUGLASI **(Waukegan Juniper)**

Splendid ground cover; effective in rockeries with its long, trailing steel blue foliage throughout the year.

2-4 inch, C. T.75	6.00
4-6 inch, C. T.	1.00	8.00

JUNIPERUS JAPONICA OBLONGA

Semi-upright, with short light green leaves. One of very interesting junipers.

4-6 inch, C. T.85	6.00
12-15 inch, G. TTT.	3.50	
18-24 inch, field, B&B60	
2-3 feet, field, B&B	1.00	

JUNIPERUS VIRGINIA CANNATI

Shape and habit are the same as *Glaucia* but foliage is bright green. It grows well down south as well as up north.

	Each	10	100
10-12 inch, G. TT.		3.00	25.00
12-18 inch, G. TTT.		3.50	30.00
2-3 feet, field, B&B	1.00		
3-4 feet, field, B&B	1.50		

JUNIPERUS VIRGINIA ELEGANTISSIMA (Golden Tip Juniper)

12-18 inch, G. TTT.	3.50
3-4 feet, field, B&B	1.50

JUNIPERUS VIRGINIA GLAUCA (Silver Juniper)

Known as Silver Juniper. Ours was grafted last spring and grown one year under lath. Can lining out in the field with perfect safety.

10-12 inch, G. TT.	3.00	25.00
12-18 inch, G. TTT.	3.50	30.00
18-24 inch, Field, B&B75	
2-3 feet, Field, B&B	1.00	
3-4 feet, Field, B&B	1.25	
4-5 feet, Field, B&B	1.75	

JUNIPERUS VIRGINIA KOSTERI

Semi-dwarf. Closely resembles in appearance to Pfitzer Juniper, but grows slightly taller than the other. Spreads naturally with dense foliage of light blue. It also thrives well down south as well as north.

6-8 inch, C. TT.	1.00	8.00
8-12 inch, C. TTT.	1.25	10.00
12-15 inch, C. TTT.	1.50	12.50
2-3 feet spread, B&B	1.00	
3-4 feet spread, B&B	1.50	

PODOCARPUS SINENSIS MACROPHYLLA (Large Leaved Japan Yew)

Dark green leaves with upright stem. Thrive well in sunny spot as well as in shady place. Growth of this variety is not so slow as the other yews, particularly our strain is in nature of upright growth and very rapid grower with large leaves.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.90	7.00
3-4 feet, field, B&B	1.00	
4-5 feet, field, B&B	1.25	
5-6 feet, field, B&B	1.50	

RETINOSPORA DECUSSATA

8-12 inch, C. T.85	6.00
12-18 inch, C. T.	1.00	8.00

RETINOSPORA ERICOIDES (Columnar Cypress)

It resembles somewhat to *Squarossa Sieboldi*, but much more compact and columnar. Fast grower.

6-8 inch, C. T.75	6.00
8-12 inch, C. T.	1.00	8.00
12-15 inch, C. TT.	1.25	10.00

RETINOSPORA FILIFERA (Thread Leaved Retinospora)

A graceful compact evergreen with drooping thread-like leaves and branches. Very hardy and decorative.

	Each	10	100
6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
12-15 inch, C. TT.		1.00	8.00
18-24 inch, Field, B&B50		
2-3 feet, Field, B&B65		

RETINOSPORA FILIFERA AUREA (Golden Thread Leaved Retinospora)

A graceful compact evergreen conifer with pendulous thread like branches. Its golden color is exceptionally attractive.

6-8 inch, C. T.80	6.00
8-12 inch, C. T.	1.00	8.00
12-15 inch, C. TT.	1.50	12.00

RETINOSPORA LEPTOCLADA

Entirely different from Retinospora Sieboldi, which is called by Western nurserymen R. Leptoclada. Dwarf and rather slow grower, short branches and very compact appearance. Leaves very small but not like scale, rather resemble to R. Obtusa Nana. Grayish green in spring and summer and turns purple in winter. Very desirable variety.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00
18-24 inch, Field, B&B60	
2-3 feet, Field, B&B75	

RETINOSPORA OBTUSA CRIPPSII AUREA

Semi-dwarf. One of the most unique golden conifers with graceful fern-like foliages. The outer tips of all branchlets shading into golden yellow.

6-8 inch, C. T.90	7.00
8-12 inch, C. T.	1.25	9.00
12-15 inch, C. TT.	1.50	12.00
15-18 inch, Field, B&B75	
18-24 inch, Field, B&B	1.00	

RETINOSPORA OBTUSA NANA COMPACTUM

Dwarf Japanese Cypress. Very dense foliage with bright green color. Very compact grower. One of the best dwarf varieties.

2-4 inch, C. T.	1.25	10.00
----------------------	------	-------

RETINOSPORA PISIFERA AUREA

(Golden Sawara Cypress)

Strong growing, rather open habit, pyramidal form, graceful golden foliage.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	

RETINOSPORA PLUMOSA (Green Plume Cypress)

Rapid grower, with foliage arranged in billowy plumes of a rich green. Its irregular outline is pleasing in soft artistic taste in landscape. Thrives very well in the Gulf States as well as in Atlantic coast.

	Each	10	100
6-8 inch, C. T.50	4.00
8-12 inch, C. TT.75	6.00
2-3 feet, Field, B&B65		
3-4 feet, Field, B&B90		
4-5 feet, Field, B&B	1.25		

RETINOSPORA PLUMOSA AUREA

(Golden Plume Cypress)

Similar to the above but its new growth is decidedly golden and very attractive. It grows somewhat slower than green Plumosa.

6-8 inch, C. T.50	4.00
8-12 inch, C. TT.75	6.00
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	

RETINOSPORA PLUMOSA ARGENTEA

(Silver Tip Dwarf Plume Cypress)

Silver tipped retinospora of extremely compact and very dwarf growth. Its being in shape of perfectly globular, most suitable for urn, beside formal planting in garden.

4-6 inch, C. T.50	4.00
6-8 inch, C. T.75	6.00
8-12 inch, C. TT.	1.00	8.00
15-18 inch, Field, B&B50	
18-24 inch, Fie'd, B&B75	

RETINOSPORA SQUARROSA SEIBOLDI

(Andely Cypress)

A broad pyramidal with fine juniper-like blue-green foliage.

6-8 inch, C. T.75	6.00
18-24 inch, Field, B&B60	
2-3 feet, Field, B&B80	

RETINOSPORA SQUARROSA VEITCHII

Pyramidal but irregular outline together with fine soft foliage of silvery blue green arranged in billowy masses like clouds of smoke gives highly artistic effect to your garden.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
12-15 inch, C. TT.	1.00	8.00
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	

THUJA ORIENTALIS (Chinese Arborvitae)

6-8 inch, S.75
8-12 inch, S.	1.50
12-18 inch, S.	2.00

THUJA ORIENTALIS AUREA CONSPICUA

(Goldspire Arbor Vitae)

The best golden pyramidal type yet produced. Tall and erect with intense golden foliage. Very hardy.

	Each	10	100
4-6 inch, C. T.75	6.00
6-8 inch, C. T.		1.00	8.00
8-12 inch, G. TT.		1.25	10.00
12-18 inch, G. TT.		1.75	15.00
2-3 feet, Field, B&B75		
3-4 feet, Field, B&B	1.00		
4-5 feet, Field, B&B	1.25		

THUJA ORIENTALIS AUREA NANA (Berckman's Golden Arbor Vitae)

We propagate only by cutting or grafting with scions from true Berckman's Golden and absolutely true to type.

4-6 inch, C. T.75	6.00
6-8 inch, C. T.	1.00	8.00
18-24 inch, Field, B&B75	
24-30 inch, Field, B&B90	
30-36 inch, Field, B&B	1.10	
3-4 feet, Field, B&B	1.25	

THUJA ORIENTALIS AUREA GLOBOSA (Golden Ball Arborvitae)

Strictly dwarf, and perfect globe shape with bright golden foliages for all seasons. We originated this valuable variety years ago from a seedling of Conspicua. Very slow grower, but we assure you it is best Arborvitae for urn or pot culture.

2-4 inch, C. T.75	6.00
4-6 inch, C. T.	1.00	8.00

THUJA ORIENTALIS BAKERII

Prettiest of all pyramidal arbor vitae. Pleasing bright green color, retaining whole summer and winter.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00
8-12 inch, C. TT.	1.00	8.00
12-15 inch, C. TT.	1.50	12.00
18-24 inch, Field, B&B50	
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	
4-5 feet, Field, B&B	1.10	

THUJA ORIENTALIS BONITA

Compact, dwarf cone-shaped, with foliages of rich green color which remains unchanged through the year.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00
8-10 inch, C. TT.	1.00	8.00
10-15 inch, C. TT.	1.50	12.00
18-24 inch, Field, B&B60	
24-30 inch, Field, B&B75	
30-36 inch, Field, B&B	1.00	

THUJA ORIENTALIS COLUMNALIS STRICTA

Originated by us. Much narrower than Bakers and decidedly columnar growth with very compact branchlets. This is indeed an ideal plant we have been looking for many years to take place of Italian Cypress which does not thrive on some soil. This is first year we offer in the market. Limited supply, book order early.

4-6 inch, C. T.	1.00	7.00
12-15 inch, G. TT.	1.50	12.00
15-18 inch, G. TTT.	1.75	15.00
2-3 feet, Field, B&B	1.00	
3-4 feet, Field, B&B	1.50	

THUJA ORIENTALIS GLAUCA
(Blue Green Arbor Vitae)

Commonly called blue-green arbor vitae. Closely resembles to Rosedale Hybrid, but color of the foliages is slightly deeper blue. Grows satisfactory in the South.

6-8 inch, C. T.75	6.00
8-12 inch, C. T.	1.00	8.00
2-3 feet, Field, B&B75	
3-4 feet, Field, B&B	1.00	

THUJA ORIETNALIS MELDENSIS
(Chinese Pyramidal Arbor Vitae)

Similar to Thuja Compacta, but grows a little narrower and taller. Foliage soft green.

6-8 inch, C. T.75	6.00
8-12 inch, C. TT.	1.00	8.00

THUJA ORIENTALIS RAMSEY'S HYBRID

Fast growing arbor vitae with stout, erect branchlets Thread-like leaves in dark green color. Stands well against drouth and heat as well as cold. The larger it gets the more handsome it becomes.

6-8 inch, C. T.75	6.00
2-3 feet, Field, B&B75	
3-4 feet, Field, B&B	1.00	

THUJA ORIENTALIS ROSEDALE

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00
18-24 inch, Field, B&B60	
24-30 inch, Field, B&B70	
30-36 inch, Field, B&B80	

THUJA TEXANA GLAUCA (Blue Arbor Vitae)

A tall, strong growing hybrid with blue foliage. Extremely rapid grower.

4-6 inch, C. T.65	5.00
6-8 inch, C. T.75	6.00

THUJA OCCIDENTALIS PYRAMIDALIS

Compact growth; narrow and pyramidal form, rich green color; perfectly hardy.

4-6 inch, C. T.75	6.00
----------------------	-----	------

THUJA OCCIDENTALIS ELWANGERIANA

Commonly called "Tom Thumb Arborvitae". A very low, broad globular in form. Foliage resembles to somewhat Juniper, or Retinospora, softest texture light green color turns to purple in winter. An important specie for Rock garden.

	Each	10	100
4-6 inch, C. T.75	6.00

BROAD-LEAVED EVERGREENS

ABELIA GRANDIFLORA

6-8 inch, C. in field50	3.00
8-12 inch, C. in field60	5.00
2-3 feet, C. in field, very bushy, B&B	.30	
3-4 feet, C. in field, very bushy, B&B	.40	

ARDISIA GRENULATA

A compact evergreen shrub with thick, dark green foliage and bright red berries late fall to winter. Rather slow grower; height is about 2½ feet.

2-4 inch, S. from 2½ inch pots75	6.00
--------------------------------------	-----	------

AUCUBA JAPONICA VARIEGATA

Beautifully variegated dark green leaves on stout, round, green branches. Hardy enough to grow in the open as far north as Washington, D. C. One of the best shrubs for shady places.

4-6 inch, S. from 2½ inch pots90	7.00
6-8 inch, S. from 2½ inch pots	1.10	9.00

AZALEAS

City of Mobile has been known last several years to the world as "Azalea City". Besides those already planted many years ago annual plantings in public places and private residences are totaled many times of a thousand. We dare to say there is no floral display equal to that of Mobile in spring when Azaleas in full bloom. No wonder so many visitors pour in this Gulf City from every direction, March to May, simply to see these beautiful views. Azaleas in contrary to general belief or rather guess, are by no means hard to grow, providing a certain requirement fulfilled. We are in strong belief that Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina and hardy Japanese Azaleas still further to the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in said territories to try more or less like we did years ago. A few cultural suggestions as the following:

1. Azaleas thrive in soil of acidity. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case Azalea to be planted in such a soil remove original soil and use plenty of leaf mold or peat moss mixed with the other soil, no alkali contained or apply Aluminum Sulphate at the rate of 4-inch pot full to a wheelbarrow of soil.

3. As Azalea root system is very shallow it dries fast. Give enough water to keep roots moist always.

4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be selected where all surplus water will run off quickly.

5. Azalea thrive best at partly shady place (when the bush grows larger it stands in full sunlight) but many good blossoms cannot be expected if planted under entire shade.

6 Azalea is not very gross feeder. If plenty of leaf mold or such rotten organic matter applied on it does not require any commercial fertilizer. On contrary very often heavy application of fertilizer injures the root system. However, if necessary light application of well rotted cow manure, sheep manure or cotton seed meal is beneficial.

7. Red spider and Thrip some times trouble the growers. Frequent syringing of the plant with plain water will usually keep it down. If this does not control spray or dust the plant with sulphur mixture.

(* Mark indicates that very limited supply for certain size)

AZALEA (Two new Azaleas Introduced by Us)

GULF PRIDE

A sport of Indica Alba (Ledifolia Alba). Flower medium to large, straight petals of most charming light purple color, could never be seen in other varieties, with four or five flowers clustered like Rhododendron. It blooms at mid-season. Leaves broad and thick, dull green covered with hairy secretion. Rather upright and open growth unless well pinched. Very hardy and stands against cold better than any other Indica varieties.

VIOLA

A sport of Indica Rosea (Ledifolia Rosea) Character of parent tree faithfully inherited, but the color of the flower that is admirable violet mauve. Very hardy and vigorous grower.

AZALEA INDICA

PINK AND ROSE RED FLOWERS

BRILLIANT—Bright water-melon red, flower medium, mid-season, small leaves, compact growth.

CROEMINA—Shell pink, large flower, earliest bloomer and very rapid grower, but not compact.

GEORGE FRANC—Flame pink with deep carmine spot near the throat, large flower, early.

HARRY VEITCHII—Beautiful pink, large flower with waved petals. Mid to late season. Rather slow grower.

***MAXWELL**—Carmine red, mid-season, very hardy.

PERFECTION—Rose pink, large flower, mid-season.

***PRAESTANTISSIMA**—Carmine red, blooms a week earlier than Pride of Dorking.

PRIDE OF MOBILE—Lovely watermelon pink. Flower very large, mid-season. Large leaves, very vigorous grower. One of best Indica Azaleas.

PRIDE OF DORKING—Beautiful cerise or carmine, late compact low grower.

ORANGE RED

***COCCINEA MAJOR**—Brilliant scarlet, early season, small leaves.

***GLORY OF SUNNINGHILL**—Large orange scarlet flower, late, compact grower.

MOSS POINT RED—Orange red with purple spots at the throat, mid-to-late season.

PRESIDENT CLAY—Orange red with purple spot at the throat. Bloom early.

SALMON

DAPHNE SALMON—Medium flower with light salmon, early

DUC DE ROHAN—Medium size flower of lovely salmon pink, bloom early, leaves small, shiny green, compact.

DUKE OF WELLINGTON—Soft salmon, with darker center, mid-season.

MOSS POINT LATE SALMON—Pretty salmon color, very large flower with widely waved petals. Very late, hardy vigorous grower.

WILLIAM BULL—Double flower of mud-red color, late, exceedingly vigorous and upright grower.

LAVENDER-LILAC

FORMOSA—Large lavender flower, mid-season, large leaves most vigorous grower.

OMURASAKI—Large, dark lavender flower, hardy, mid-season.

***ORCHID LAVENDER**—Medium flower of light orchid lavender pink, very early, upright growth.

PHOENICIA—Lavender, pink mid-season, low and compact.

ROSY PURPUREA—Wine-red color. Late blooming.

***VITATA FORTUNEI PURPLEANA**—Separated from variegated kind, fine lavender pink, very early, upright open growth.

WHITE

***FIELDERS WHITE**—Large white flower, early.

FLAG OF TRUCE—Mid-season, full double with waved petals.

INDICA ALBA—(Ledifolia Alba) Snow white large flower, early to middle season, very hardy.

LATERETIA ALBA—Medium size pure white flower, late small leaves, very compact growth.

VARIEGATED

CRITERION—White ground well marked with wide pink stripes, late, compact.

INDICA ROSEA—(Ledifolia Rosea) Extra large flower of white with rose throat. Mid-season, upright.

IVERYANA—White ground marked with narrow, faint pink stripes, late, compact.

LADY EDITH—Variegated just like Criterion, but the flower slightly smaller and color of pink softer. Mid-season, compact.

***VITATA FORTUNEI**—White ground well striped with lavender pink. Very early. upright, open grower.

HARDY JAPANESE AND KURUME AZALEA

Group "B"

BRIDE MAID—Bright salmon red flower in large trusses. Mid-season, low compact.

CHRISTMAS CHEER—Pleasant Christmas red, flower rather small, hose-in-hose. Heavy bloomer, early, compact.

CORAL BELL—A pleasing coral pink color shading deeper toward center. The flower, very dainty and produced profusely. Hose-in-Hose type. Low, compact growing.

***DAY BREAK**—Light pink flower in dense clusters. Mid-season

HEXE—(Firefly)—A Kurume hybrid of low dense compact in habit, flower large in size for this group. Pleasing crimson red. Semi-double, mid-season.

HINODEGIRI—Most popular Japanese variety. Medium size single flowers of bright scarlet color. Leaves roundish, glossy green, very dwarf compact grower.

KIMUNAZOI—One of Macrantha family. Single orange red flower with extremely narrow petals. It blooms very late (at June). Leaves very narrow. Low, compact, dense grower.

MACRANTHA—Single flowering—Large flower of clear pink, very late, low headed, compact.

MACRANTHA—Double—Double flower of large size with clear pink. Very late, also a few blossoms open through the summer. Compact, but rather upright.

MACROSTEMON—Another Macrantha family. Large salmon pink flower in May.

***MARVE BEAUTY**—Beautiful shade of mauve, medium size flower, very dainty.

ORANGE BEAUTY—Good size flower of orange red color. Mid-season, compact.

PEACH BLOW—Single, pale shade of peach blossom pink. Mid-season, very fine.

PINK PEARL—Most noble cherry rose color shading lighter to center, Hose-in-hose type. Mid-season, compact, but upright.

***SALMON QUEEN**—A fine shade of salmon pink. Mid-season, hose-in-hose.

SNOW—Pure white flower profusely in cluster. Hose-in-hose. Mid-season, low, compact, one of best white variety.

***SUNSTAR**—Flower single, dark rose pink with carmine stripes, not large in size but very dainty.

***SWEET BRIER**—One of Dreer's introduction. It is said that this is one of the hardiest in its group. Flower elegantic rose pink.

YAEGIRI—Salmon red, hose-in-hose, mid-to-late season, compact.

CAMELLIA JAPONICA

Commonly known as "Japonica" in the South; becoming recently most popular plant not only in the Gulf Coast Region alone, but all over the Country. Its glossy, green foliage of year around together with most attractive, beautiful flower at winter when no other flowers found in the garden has been increasing admirers of this plant and setting done by millions every year, in open grounds or in conservatories and greenhouses as pot plant. It will regain, without any doubt, its popularity stronger than a half a century ago, even as a cut-flower.

Brief Cultural Hints

SOIL PREFERRED—Camellia grows almost any soil, but well drained, good Garden soil, a little acid reaction, is more suitable.

LOCATION DESIROUS—Half shady location is preferred, especially when the plants are young; free blooming cannot be expected in a place entirely shady.

ROOT-SYSTEM, TRANSPLANTING—Root-system of Camellia is rather coarse and not quite so easily transplanted as we can with Azaleas. For this reason we recommend strongly pot plant as set-back would be reduced to its minimum. Moreover pot plant can be removed almost any time of year, while the plant from open ground has to be moved in winter or some time when it is in dormant stage.

FERTILIZATION EFFECTIVE—Camellia is a gross feeder; it responds well to fertilization. At the time of planting, if the soil is not fertile enough, use mixture of one-half of garden soil, one-fourth of well rotted cow manure and one-fourth of peat or leaf mold. Every winter or early spring apply well-rotten cow manure; bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotten leaves or peat is also beneficial.

WATERING PROPER—Camellia loves humid atmosphere. Do not neglect the watering. Frequent syringing on the leaves helps a great deal, especially at hot, dry summer months.

PRUNING RIGHT—Proper pruning is also essential. Prune with care such as water shoots, dead or injured branches and branches growing too close together. General pruning should be done in the month of February, otherwise it may have effect on flower buds.

SPRAYING ADVISABLE—Red spider and various scales may attack on Camellias. We have been using "Volck, Jr., at ratio of 1 to 40 in summer and 1 to 25 in winter, mixing teaspoon full of Black Leaf 40 to every gallon of solution. Couple times of thorough sprays in a year controls those pests satisfactorily. Strong Sun has to be avoided immediately after the spray as it may cause the leaves to burn.

Another Advice for Potted Camellias

Pots of "Standard" size generally used for Camellias. Two-fourth of good garden soil, one fourth of well rotten cow manure and one-fourth of leaf mold or peat moss may be mixed for soil of pot plant.

A couple handfulls of bone meal or cotton seed meal added to each wheelbarrow of soil is found beneficial. For potting usual method is adapted. Should the plant be pot grown never to forget work done "Shoulders" at the top, removing all the earth that can be taken away conveniently. Water thoroughly after potted and confine them in a cool place for a week or ten days, giving them air and light gradually. Watering is not necessary to be done too often, but water them thoroughly that moisture will be sure to reach the bottom of the pot. Frequent syringing is essential. When weather is dry, syringe once every day; twice at hot summer months. If the plant shows innutritious condition you may take it out from the pot and carefully study its cause. It may be result of poor drainage which makes the root rot, or perhaps effect of underfed. In case later apply liquid manure from time to time—it will regain shortly healthy condition. Potted Camellias generally taken into greenhouse, although not neces-

sary to do so, where best results can be obtained by keeping it rather cool in temperature of 45 to 50 degrees at night and 50 to 55 during day. When flower-buds begin to swell the temperature may be increased 5 to 10 degrees higher. Excessive high temperature and wide variation should be avoided.

Careful attention is also invited for ventilation; otherwise flower buds may drop. In spring, when danger of frost is over, remove it to out doors somewhere partly shady spot. Plunge the pot in the ground, giving sufficient room for each plant. Painful care of summer months will present you a healthy, vigorous plant with plenty of flowers next fall.

We have this season Camellia stock very much finer than heretofore, as it had extra vigorous growth during the summer. Supply of some varieties, however, is limited, for numerous large orders have already been booked before issuance of this catalogue. We suggest that you, therefore, book your orders at the earliest possible date; otherwise we may not be able to meet your valued demand in exact varieties in exact grades as you desire.

Plants offered here are all pot-grown with exception of large specimens. It is our strong belief that pot grown Japonicas are far superior to the plants from the ground and poorly balled and burlapped. Plants from pot can also be safely removed any time of year. Our Camellia stock this year are listed in three Groups, prices of each group being different. Rareness of varieties, scarcity of the kind are of course the main reason of higher prices. Some varieties listed in moderate rates may have better quality in every respect, but if the supply is abundant prices are in consequence.

Group One

ABBY WILDER—Pink, very double, peony-form. Generally pink in color, but sometimes marked with white. (Abby Wilder is generally pink and white variegated. This strain must be propagated from pink branch).

CHANDLERII ELEGANS—Semi-double to double. Flower very large, sometimes its measure reaches seven inches across. Pink variegated with white, somewhat peony form mixed with yellow stamens. Leaves medium to large, thick, pointed and somewhat curled. Dark, glossy green. Rather slow grower, but blooms freely at early age.

COUNTESS OF ORKNEY—Very double, pink stripes on white ground. Leaves medium, pointed, shinny green. Very slow grower but it blooms very young and small. Best variety for pot culture.

X **GUILBAU'S PINK**—Flower very large, semi-double to double, lovely light rosy pink. Shape of flower resembles to Chandlerii but lighter pink and no white variegation generally. Leaves thick, but small, light green. Blooms very freely in early season.

HERME—Semi-double, very large flower, variegated pink and white, generally white margin in the petals. Leaves rather small and pointed.

LADY HUME'S BLUSH—Medium flower, very full double, very delicate flesh pink. Leaves medium to large, thick, lighter color, large, vaine makes distinct from others. (We can supply this variety only in 2½ inch pot spring delivery.

OTOME—Very much alike to Pink Perfection, but flower slightly larger so with petals. Leaves dark green in color but not quite so glossy as the other.

PROF. SARGENT—Full double, peony form, very tight in center. No yellow stamens mixed, color dark red. Leaves roundish, large, thick, glossy green.

LADINIER'S RED—As real name is not yet confirmed this name used here temporarily. Flower very large and very double. Numerous narrow and small petals overlapped in numbers, very symmetrically. Color, bright red to dark red. Leaves long and narrow, pointed not sharply, smooth and lighter green. One of the best red Camellias.

REINE DE FLAURES—Flower rich vermillion red flaked with white. Leaves medium, roundish, thick, light green. (We can supply this variety only in 3 and 4 inch pot plants).

Group Two

ALBA PLENO—One of the best and widely known white Japonicas, full double, large pure white, early bloomer. Leaves narrow and pointed, being somewhat crinkled.

AMERICANA—Fleshy color striped with crimson, full double. leaves medium pointed, free bloomer.

ARNALDA DE BRESEIA—Double, deep pink, with small strip of white in center of the petals. Leaves large roundish, thick, dark green. Early and free bloomer.

BROOKLYANA—Very double, medium flower, deep pink mottled with white, blooms early season. Leaves large and thick, light green, smooth, very vigorous grower.

CANDIDISSIMA—Medium flower, pure white, over-lapped each other symmetrically forming star-shape. Leaves very small. Late bloomer.

CHEERFULNESS—Flower, medium size of deep pink. Full double when the flower is fully opened, some times a little yellow stamens can be seen. Very early season and free bloomer. Leaves small, roundish thick, dark waxy shiny green.

+ **DERBEYANA**—Semi-double to double, dark red or vermillion red, large flower and large petals with yellow stamens mixed. Leaves very large, thick, glossy waxy green.

GOVERNOR MOUTON—One of very popular varieties in Louisiana. Flower medium to large, with color of most pleasant oriental red with marked with white spots. Somewhat peony form, many small petals mixed with yellow stamens, middle season, free bloomer. Leaves light green and not so thick.

LADY SAUMEREZ—Semi-double, pleasant cherry red. Early bloomer. Leaves rather narrow and sharply pointed, with shiny glossy green.

LADY VAN SITTY—Semi-double, most desirable color of red. Leaves very narrow, pointed and curled, dark glossy green.

MADONA—Double flower, flesh color, some times spotted with darker color. Leaves large and thick, with glossy green.

MM. PICOULINE—Semi-double, with crimped petals, bright red large flower. Leaves medium roundish, dark green.

MARGUERITE GOUILLON—(Duke de Orleans)—Peony form, large flower with creamy white ground flaked and dotted with rosy pink. Leaves roundish, broad, light green.

MATHOTIANA ALBA—Flower very large in shape like cup on saucer. Pure white, but seldom striped with slight pink. Leaves very large, thick, broad and shiny. Late bloomer.

OPELOUS PEONY—Peony form, large flower with light pink with red veins which makes it very beautiful. Occasionally spotted with white. Leaves very small.

PINK PERFECTION—Medium size flower, shell pink, very full double with immense small petals symmetrically arranged. Very early and free bloomer.

PURITY—Pure white, double but rather open center, large flower. Leaves medium to large, course appearance rather dull green, free bloomer and hardy.

ROSE EMRY—Peony form of medium size, dark crimson in color, blooming very freely in early season. Leaves medium to large, dark green but not so shiny.

WHITE TRICOLOR—Propagated from branches which had pure white flowers of Tricolor. Flower very large, semi-double, with a group of yellow stamens in center. Leaves medium, narrow, very shiny green.

TWO WILD SAGES, With

Being Believed by Us the B

RED SAGE (Clinopodium Coccineam)

This is one of the most prospective native plants of South Alabama. It grows in poorest sandy or rocky soil. A slender, sparingly branched shrub of two or three feet tall with small evergreen leaves and horizontal, tubular, bright red flower blooming all the summer and the fall until just before Christmas, especially at autumn, even young plant of a few inches, covered with mass of red flowers. In addition to its attractive appearance, it has pleasant odor which might possibly be utilized in perfumery. No cold spell ever injured this plant down here, it may stand near zero weather, probably lower. No doubt this is one of most suitable plants for Southern rock garden, also it will be very valuable pot plant. We offer this year cutting grown and potted plants, as we have found plants collected are hard for transplanting.

Prospect of a Great Future

st of Our New Introductions

BLUE SAGE

(*Conradina Canescens*)

A low, dense, compact shrub, with small narrow, beautiful silver colored evergreen leaves. The flower resembles very much to Rosemary, pale bluish blossoms from early summer to late fall. It thrives on dry, poor soil. It is indeed a suitable plant for rock garden also border planting, as well as pot plant.

We offer cutting grown and Potted Plants

25 plants, 6-8 inch, from 2½ inch pot, 2-3
plants in pot\$2.00

Group Three

DARSII—Medium flower, semi-double to double with yellow stamens. When fully opened most admirable bright red. Early and free bloomer. Leaves medium and roundish, dark glossy green.

JARVIS RED—Semi-double to double. Large flower of dark vermillion, petals large and crinkled, yellow stamens mixed. Leaves rather narrow and pointed and somewhat crinkled. Very free bloomer and vigorous grower.

CARNATION—Flower small, peony form, dark red, somewhat resembles to Prof. Sargent. Leaves rather narrow and very dull green.

SARAH FROST—Widely planted in Gulf Coast. Flower very double, crimson, very free bloomer at middle season. Very thrifty and easiest grower.

UNNAMED VARIETIES—(Will be named as soon as confirmed) sold by color and not by name.

CAMELLIA SASANQUA

In despite of recent introduction to this country, Camellia Sasanqua has already been widely known and gaining its popularity among flower lovers with wonderful speed. It blooms ahead of Japonica by months—generally from September to December. Size of blossom is about same as Camellia Japonica in different colors. Leaves are much smaller and branches slender which appearance gives softer taste to landscaping. It has also a great future as a pot plant.

CLEOPATRA (Dai-Kagura)

Our recent introduction under special permission of the Federal Government, and this is first year to offer our customers. Flower large, full double, peony form, color is bright red. This is most beautiful Sasanqua. Leaves rather small and roundish, and somewhat crinkled. (Very limited supply—order early).

4-6 inch, from 2½ inch pot	5.00	40.00
6-8 inch, from 3 inch pot	7.50	65.00

DAWN—(Akebono)

This is also our introduction. Flower semi-double with yellow stamens. Ivory white with flesh pink at the margin of the petals as if the first ray of sunlight in early morning. Leaves very thick and narrow, dark green, occasionally variegated. Very compact and symmetrically pyramidal shape. Slow grower.

COTONEASTER FRANCHETI

A tall conical plant of upright growth with arching branches. Flower small and pink in color. Berries orange yellow tinged with red. One of hardy varieties in the South.

COTONEASTER HARROVIANA

One of the good Cotoneasters, particularly at the Pacific Coast very highly praised. It resembles much to Francheti but bears more berries that are red.

COTONEASTER PANOSA

One of the well thriving Contoneasters in the Southern climate. Silvery leaves together with abundant red berries are most attractive.

COTONEASTER S. P. No. 64253

Small leaved Cotoneaster, but upright growing habit, with arching branches, very hardy.

COTONEASTER SALICIFOLIA

Willow-leaf cotoneaster. Large growing shrub of graceful habit of arching branches. Bright red berry after small white flowers.

6-8 inch, C., from 2½ inch pot90	7.00
--------------------------------------	-----	------

ELAEAGNUS PUNGENS FRUITLANDI

Leaves very large and glossy green with silvery beneath; bore abundant edible fruit even in its young age.

4-6 in. C., 2½ in. pot (Spring Del. only)75	6.00
8-12 inch, C. TT.90	7.00
12-18 inch, C. TT.	1.50	12.00
2-3 feet, Field, B&B75	
3-4 feet, Field, B&B	1.00	
4-55 feet, Field, B&B	1.50	

ELAEAGNUS PUNGENS MACULATA (Yellow Center Elaeagnus)

Both of them variegated, but one has yellow center with dark green margin, the other yellow edge and green center that will not be changed by sun nor cold. Most beautiful evergreen shrub among other dark green shrubs.

4-6 in., 2¼ in. pot (Spring Del. only)90	7.00
2-3 feet, Field, B&B	1.00	
3-4 feet, Field, B&B	1.25	
4-5 feet, Field, B&B	1.75	

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

4-6 inch, C., 2¼ inch pots (spring delivery)75	6.00
2-3 feet, Field, B&B75	
3-4 feet, Field, B&B	1.00	

ELAEAGNUS GLABRA

Semi-weeping habit with long slender branches. Leaves silvery in color, resembles somewhat to E. Umbellata. Secure seeds from Japan.

12-18 inch, S. TT.90	7.00
18-24 inch, S. TT.	1.10	9.00
18-24 inch, Field Grown, B&B75	

ERICA CARNEA

Spring Heath. A hardy dwarf variety with rosy red flower. Very suitable for rock garden.

ERICA MELANTHERA

The best known and widely planted of the Heathers. Blooms in winter, from November to March in solid mass of small rosy white flowers. Juniper-like foliage of light green color. It thrives well out-of-doors where climate is warm and is valuable as a pot plant for the North.

ERICA PERSOLUTA ROSEA

Similar to E. Melanthera but flowers are more brilliant in color, deep rose pink. It does not grow quite as fast as E. Melanthera.

PRICES ON THREE ERICAS

	Each	10	100
4-6 inch, C., from 2¼ inch pot90	7.00

EURYA JAPONICA

A fine shrub or small tree, grows to twenty feet in height. Leaves ovate or obovate, 1½ inch by 2½ to 3 inches in size. Thick and dark glossy green, slightly serrate. Grows symmetrically pyramidal shape with compact branches. This is supposed to be one of the cleanest bushes in Japan and planted extensively in temple and shrine gardens. Foliage commercialized by considerable quantity as a green for floral works.

6-8 inch, S. TT.	1.00	8.00
8-12 inch, S. TT.	1.50	12.00

ESCALLONIA ALBA

Evergreen shrubs with spreading habit. In summer it produces great profusion of pure white flowers on spikes.

8-12 inch, C. TT.90	7.00
------------------------	-----	------

EUONYMUS CARRIERI

Similar to Euonymus Radicans but not creeper. Leaves shiny green, but some times turn to bronze color after severe frost. It grows well in sun as well as in shade; very hardy.

EUONYMUS PATENS (E. Sieboldi)

Broad and more spreading habit in growth. Said semi-evergreen in the north, but leaves stay green entire winter in the southern states. Brilliant scarlet berries in fall are most attractive. Absolutely hardy.

12-18 inch, C. T.75	6.00
------------------------	-----	------

FATISIA JAPONICA

Much resembles to Aralia Spinosa, but this is evergreen and stand much colder temperature without losing leaves. Foliage large and glossy shiny green with shape of five fingers spread. There is not many trees or shrubs in existence grow in entirely shady place, but this Fatisia thrives better in such location where most of the others cannot grow. Newly introduced, very attractive plant.

8-10 inch, S. TT.	1.50	12.00
10-12 inch, S. TT.	2.00	15.00
12-18 inch, Field, B&B50	

FEIJOA SELLOWIANA (Pineapple Guava)

Compactly growing shrub. Leaves green with silvery underneath. One of most desirable plants for the Gulf Coast.

	Each	10	100
4-6 inch, C., 2½ inch pot75	6.00
12-18 inch, C. TT.		1.25	10.00

GARDENIA FLORIDA (Cape Jasmine)

Well known evergreen shrub under the name of Cape Jasmine. Leaves large glossy dark green. Flowers large, double, pure white. Very highly scented. Hardy outdoor plant as far north as Nashville.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00
2-3 feet, Field, B&B75	
3-4 feet, Field, B&B	1.00	

GARDENIA RADICANS (Creeping Cape Jasmine)

It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. A very plant for rock garden. Doubtlessly suitable as a pot plant to florists for Mother's Day trade as well as that of Memorial Day.

4-6 inch, 2½ inch pot75	5.00
6-8 inch, C., 3 inch pot	1.25	9.00
8-12 inch, C. TT.	1.00	8.00
12-15 inch spread, Field, B&B40	
15-18 inch spread, Field, B&B60	
18-24 inch spread, Field, B&B	1.00	

GARDENIA VEITCHII (Winter Blooming)

Winter blooming gardenia. This is the very variety Eastern florists estimate very highly for winter cut flowers.

4-6 inch, C., 2½ inch pot	1.25	10.00
6-8 inch, C., 3 inch pot	1.75	15.00

ILEX (Holly)

Holly of any variety in general is very difficult to transplant, therefore we offer you this year carefully grown pot plants as we know best result can be obtained by this method.

I. CASSINE (Dahoon Holly)

A popular evergreen, being native to Northern Florida. Leaves have no spine, much resembles to Ilex Integra, but not so shiny green as the other. Producer of bright red berries in abundance.

4-6 inch, C., from 2½ inch pot75	6.00
--------------------------------------	-----	------

I. CASSINE ANGUSTIFOLIA

An evergreen with very narrow leaves. Produces red berries in early age.

4-6 inch, C. from 2¼ inch pot (Spring delivery only)75	6.00
---	-----	------

I. CORNUTA (Chinese Holly)

A very handsome holly with large spiny, dark shiny glossy green leaves with large red berries.

4-6 inch, C., from 2¼ inch pot75	6.00
6-8 inch, C., from 3 inch pot, 2-yrs.	1.25	10.00

I. CORNUTA FEMINA

Appearance and character exactly alike to former variety except that sure to bear the berries. Our cuttings taken from bearing specimens.

4-6 inch, C., 2¼ inch pot

	Each	10	100
(Spring delivery only)		1.25	10.00

ILEX CRENATA (Japanese Dwarf Holly)

2-4 inch, C., 2¼ inch pot

(Spring delivery only)50	4.00
------------------------------	-----	------

ILEX CRENATA ROTANIFOLIA

Similar to former variety, but leaves are much larger and quite roundish.

4-6 inch, C., 2¼ inch, pot65	5.00
8-10 inch, C. TT.90	7.50
10-12 inch, C. TT.	1.10	9.00
12-15 inch, C. TT.	1.50	12.00
15-18 inch, Field, specimens, B&B45	
18-24 inch, Field, specimens, B&B60	

ILEX GLABRA (Inkberry)

Bright, shiny green leaves; fruit black. Splendid for massing in shady location.

4-6 inch, C., 2¼ inch, pot (Spring delivery)....	.75	5.00
--	-----	------

ILEX INTEGRA

A beautiful evergreen. Leaves oblong with tapering point, shiny dark green. White flowers at May and beautiful red berries in winter.

4-6 inch, C., 2¼ inch pot (Spring delivery)90	6.00
6-8 inch, C. TT.	1.00	8.00
8-12 inch	1.25	10.00

ILEX LATIFOLIA (Big Leaved Holly)

Hardy evergreen shrub. Leaves oval to oblong lanceolate, very thick, serrate, glossy green above, very large—sometimes reaches 7 inches long and 3 inches wide. Small flower at May and cluster of red berries at winter.

4-6 inch, S. TT.	1.25	10.00
6-8 inch, S. TT.	1.75	15.00
8-12 inch, S. TT.	2.25	20.00
2-3 feet, Field, B&B	2.00	
3-4 feet, Field, B&B	3.00	
4-5 feet, Field, B&B	5.00	

ILEX OPACA FEMINA (Berried Kind)

Well known native evergreen, growing everywhere wild. However, this wild plant is hard to be transplanted successfully. Moreover, it bears no berry in many cases. Our propagation was done by cuttings secured from best berry-bearing specimen and guaranteed to bear.

4-6 in., 2¼ in. pot (Spring Del. only)75	6.00
6-8 inch, 3 inch pot	1.25	10.00

OVERLOOK NURSERIES
1933-34

ILEX VOMITORIA FEMINA (Berry Bearing Yaupon)

Ours propagated strictly by cuttings from heavily berried specimens.

	Each	10	100
4-6 inch, C., 2½ inch pot75	6.00
6-8 inch, C., 2½ inch pot		1.00	8.00
8-12 inch, C. TT.		1.10	9.00
12-18 inch, C. TT.		1.50	12.00

JASMINUM FLORIDUM

Hardiest evergreen jasmine, with very dark glossy foliage in graceful arching branches. Very attractive. Yellow flowers in cluster.

8-12 inch, C. T.75	6.00
12-18 inch, C. T.	1.00	8.00
12-18 inch, Field, B&B35	
18-24 inch, Field, B&B50	

JASMINUM PRIMULINUM (Primrose Jasmine)

Evergreen shrub with thick green leaves on arching branches. Bright yellow flowers in spring. Very vigorous grower.

8-12 inch, C. T.75	6.00
2-3 feet, Field, B&B65	

LAUROCERASUS CAROLIANA (Cherry Laurel)

A well known native evergreen. Compact glistening green foliage of medium size. Very attractive as foundation planting, especially in large estate or in park. It also is effective for formal planting when sheared in standard, pyramidal or other shape.

6-8 inch, S.50	4.00
8-12 inch, S.75	6.00
12-18 inch, S.	1.00	8.00

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. One of the most useful plants for southern planting.

6-8 inch, C. T.75	6.00
8-12 inch, C. TT.	1.00	8.00
12-15 inch, C. TT.	1.25	10.00

LIGUSTRUM CORIACEUM (Dwarf Privet)

Dwarf privet in peculiar shape with leathery, thick, dark green leaves imported from Japan years ago and we have found leaves of our strain are much thicker and more curled. We have this season only limited quantity in small sizes to offer.

2-4 inch, C. T.50	4.00
4-6 inch, C. T.75	6.00

LIGUSTRUM JAPONICUM MACROPHYLLUM

A greatly improved strain of Ligustrum Japonicum. Distinguished by exceedingly large thick glossy leaves. The true type and form could only be obtained by grafting.

LIGUSTRUM JAPONICUM AUREAUM

MARGINATUM (Golden Tip Japan Privet)

Much deeper yellow margin on young growth. Bore heavily with purple berries in winter. Contrast with leaves in colors admirable.

LIGUSTRUM JAPONICUM EXCELSUM SUPERBUM

Best of all Japan privets. Leaves variegated with creamy white. Contrast with other green foliages gives exceedingly good effects to view of the garden. Supply limited. Order early.

	Each	10	100
2-3 feet, Field, B&B35		
3-4 feet, Field, B&B50		
4-5 feet, Field, B&B	1.00		
Bare roots at half price			

LIGUSTRUM LUCIDUM COMPACTUM (True Waxy Privet)

Our strain is in extra dense compact growth with very dark waxy green thick leaves. Very hardy and thrives in most any kind of soil with no particular attention for care. Indeed this is most satisfactory plant for general planting.

4-6 inch, C. T.40	2.50
6-8 inch, C. T.50	3.50
2-3 feet, Field, B&B50	
3-4 feet, Field, B&B75	
4-5 feet, Field, B&B	1.00	

LIGUSTRUM LUCIDUM GRACILIS (Giffing)

A tall slender shrub with strong upright branches. Leaves pointed thick, shiny and dark green. This variety and Black Leaf are two darkest green leaved species of all Lucidums.

LIGUSTRUM REPANDA (Crinkled-leaf Privet)

Closely resembles to Ligustrum Pyramidalis but leaves narrow and crinkled.

4-6 inch, C. T.40	2.50
12-18 inch, C. TT.	1.00	7.50
3-4 feet70	
4-5 feet90	

LIGUSTRUM IONANDUM

Recent introduction by an agricultural explorer. Leaves very small, like boxwood. On account of its dwarfness, most desirable for low hedges or border planting.

8-12 inch, C. TT.75	5.00
12-15 inch, C. TT.	1.00	8.00

MAGNOLIA FUSCATA (Michelia Fuscata)

Well known Southern shrub with handsome compact ever-green foliage and sweet carmine edged yellow flower which has strong banana-like fragrance. One of the very useful plants for Southern landscape gardening.

6-8 inch, C., 2½ inch pot	1.15	9.00
6-8 inch, C. T.	1.00	8.00
8-12 inch, C. TT.	1.25	10.00
2-3 feet, Field, B&B	1.00	
3-4 feet, Field, B&B	1.25	

MAGNOLIA GRANDIFLORA

Very well known Southern Magnolia. Grandest broad-leaver evergreen in the Southern forests.

	Each	10	100
6-8 inch, S.50	4.00
8-12 inch, S.75	6.00

MAGNOLIA GLAUCA

Southern Bay tree of native forest. Graceful shape of the tree together with large green leaves, silvery white beneath, very attractive.

8-12 inch, S. T.75	6.00
12-15 inch, S. T.	1.00	8.00

MAHONIA JAPONICA BEALI

Broad holly-like leaves of very thick texture with spiny edges. Bell shaped yellow flower usually in mid-winter, being followed by cluster of purple berries. This variety thrives well in the South where Mahonia Aquifolium fails to grow, being burnt. Do well under partly shade.

8-10 inch, S. TTT.	1.10	9.00
10-12 inch, S. TTT.	1.25	11.00
12-15 inch, B&B40	

MAHONIA FORTUNEI

Low shrubby, somewhat resembles to Nandina. Leaves long and narrow, serrated with small teeth. Long racems elect at winter time with numerous bright yellow flowers.

6-8 inch, C., from 2½ inch pot	1.00	8.00
--------------------------------------	------	------

MALPIGHIA GLABRA (Barbadoe Cherry)

Low headed evergreen shrub with rosy flowers and red berries. Too tender for the Northern planting, but most suitable for pot plant.

8-12 inch, C. T.75	6.00
12-15 inch, C. T.	1.00	8.00

NANDINA DOMESTICA

A pretty Japanese evergreen shrub, grows well in sun as well as in shade. Shape of the foliage and growing habit are entirely different from that of ordinary plants. It is most beautiful sight in winter when leaves turn to beautiful red color and scarlet berries in cluster hanging on.

4-6 inch, S. T.65	5.00
6-8 inch, S. T.75	6.00
8-10 inch, S. T.90	7.50
10-12 inch, S. TT.	1.10	8.50
12-15 inch, S. TT.	1.25	10.00
15-18 inch, Field, B&B45	
18-24 inch, Field, B&B60	
24-30 inch, Field, B&B75	

ORANGE CALAMONDIN

Most desirable variety for pot culture. The trees can easily be dwarfed and bear fruits in a early age. The fruit is small 1¼ inch in diameter, deep orange-red, thin smooth skin. Juice clear, but strong acid, and not fit to table. It ripens November to December, just before Christmas season. Leaves large and dark shiny green. Very hardy and prolific bearer. We strongly recommend this variety for pot culture.

4-6 inch, C., from 2½ inch pot90	7.00
6-8 inch, C., from 3 inch pot	1.50	12.50
8-12 inch, C., from 4 inch pot	2.25	20.00
12-18 inch, C., from 6 inch pot,		
Very bushy, bearing size	6.00	50.00

OSMANTHUS AQUIFOLIUM (O. Ilicifolium)

This is hardiest of all Osmanthus family. Thrives at New York, possibly as far north as Massachusetts. Leaves leatherly-smooth and shiny. Strong spines on both sides of foliage, somewhat resembles to Ilex Cornuta (Chinese Spiny Holly).

OSMANTHUS FORTUNEI

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.

Prices same as Osmanthus Aquifolium.

OSMANTHUS FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind fill the air of entire garden with high odor during winter and spring.

4-6 inch, C. T.75	6.00
6-8 inch, C. T.	1.00	8.00
8-12 inch, C. TT.	1.20	10.00
12-18 inch, C. TTT.	1.75	15.00
18-24 inch, Field, B&B75	
2-3 feet, Field, B&B	1.00	

PASONIA EDULIS

A variety of Japanese evergreen oaks that grows up to thirty feet in height. Leaves large, oblong to ovate, pointed, thick and smooth shiny dark green. Acorn ¾ to 1 inch long, edible. Very vigorous grower. We observed several times that this trees stood unharmed when our live oaks were badly injured by freeze.

4-8 inch, C., from 2½ inch pot		
(Spring delivery only)	1.00	8.00

PHOTINIA GLABRA

Whenever covered with new sprouts mass of burning scarlet tinted here and there with old leaves of green, will surely convince you that this is one of the best trees ever introduced. There are several different strains; beware of the inferior kinds. It may be made in any shape you desire, such as pyramidal, standard or globe. Suitable for hedge, individual planting as well as mixed setting among green leaved evergreens.

8-12 inch, C. TT.75	6.00
12-18 inch, C. TT	1.00	8.00
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	
4-5 feet, Field, B&B	1.25	

PHOTINIA SERRULATA

A large evergreen shrub or small tree. The new growth is reddish, turning gradually to a dark green. Leaves densely serrate, very conspicuous and desirable plants.

	Each	10	100
4-6 inch, C., 2½ inch pot (Spring delivery)		.65	5.00
2-3 feet, specimen, B&B		.75	
3-4 feet, specimen, B&B		1.00	

PIERIS JAPONICA (Japanese Andromeda)

Thickly shiny leaved evergreen. Grows 5 to 6 feet in height. Drooping cluster of small white flowers early in spring. Best in moisted partially shaded place.

4-6 inch, C., 2½ inch pot	1.00	8.00
6-8 inch, C., 3 inch pot	1.75	15.00
12-15 inch, Field, B&B	.75	
15-18 inch, Field, B&B	1.00	
18-24 inch, Field, B&B	1.25	

PITTOSPORUM TOBIRA

Very dense compact growth with dark green shiny leaves clustered at end of branches. Most valuable plant for Southern gardens.

4-6 inch, C. T.	.65	5.00
12-18 inch, C. TT.	1.50	12.00
10-12 inch spread, B&B	.30	
12-15 inch spread, B&B	.40	
15-24 inch spread, B&B	.60	

PYRACANTHA (Fire Thorn)

Pyracanthas are somewhat hard to transplant. Therefore we offer this year mostly pot grown plants.

P. LALANDI

Most popular and hardiest variety with golden yellow berries. Somewhat less the thorn and leaves softer texture.

P. GIBBSII

Similar to Yunnanensis but more upright grower. Berry rather small, scarlet color.

P. YUNNANENSIS

Rather dwarf and spreading habit. Abundant berries of coral color that are small.

8-12 inch, C., 2½ inch pot	1.00	8.00
12-18 inch, C. TT.	1.25	10.00

P. FORMOSANA

Possibly this is the most showy variety of all Pyracanthas. A solid mass of brilliant red berries, in large size, in fall and winter. Leaves large and dark glossy green. Upright grower.

P. CRENULATA ROGERSEANA

Newly introduced from Southwestern China by U. S. government and experimented at Chico, California. The berry is reddish orange, ¼ inch in diameter. Suitable to Gulf Coast region.

P. ROGERSEANA AURANTICA

PRICE ON ABOVE THREE VARIETIES

8-12 inch, C., from 2½ inch pot	1.00	8.00
---------------------------------	------	------

RAPHIOLEPIS JAPONICA

It grows taller than Ovata. Leaves thick leathery oblong.

RAPHIOLEPIS OVATA

A very desirable low growing evergreen shrub. Leaves oval, thick and leathery. Mass of pinkish small flowers in spring. Persistent through cold weather.

	Each	10	100
8-12 inch, S. T.		1.00	8.00
12-15 inch, S. T.		1.25	11.00
15-18 inch, Field, B&B50		
18-24 inch, Field, B&B75		

VIBURNUM MACROPHYLUM

(Sweet Viburnum). A valuable evergreen shrub with large green, oblong leaves which turn some times to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

6-8 inch, C. T.50	4.00
8-12 inch, C. T.75	6.00

VIBURNUM ODORATISSIMUM

(Glossy Viburnum). Leaves large, oblong with points, polished dark green in color. Its growth is very compact and a little hardier than V. Macrophyllum. As it bears berries of coral color it has been known in Japan as coral berried Viburnum. This is one of the most promising broad leaved evergreens in the South.

6-8 inch, C. T.65	5.00
8-12 inch, C. T.90	7.00
2-3 feet, Field, B&B65	
3-4 feet, Field, B&B90	

VIBURNUM TINUS

Small shrub of compact growth with little shiny green foliages.

4-6 inch65	5.00
6-8 inch75	6.00
8-12 inch	1.00	8.00

DECIDUOUS TREES AND SHRUBS

ACER PALMATUM ATROPURPUREUM

Blood-leaf Japanese Maple; a most favorite ornamental plant among Northern and Eastern gardeners. It sprouts out with blood red leaves and maintains the color for a considerable period of time. Nearing autumn it turns to dull green. When light frost touches, however, it turns to red again. This wonderful coloring and fascinating habit gives much softer taste to our Southern gardens that are stiffened by too many evergreens in almost same color.

4-6 inch, C., from 2¼ inch pot	1.75	15.00
--------------------------------------	------	-------

ALBIZIA JULIBRISSIN (Minosa Tree)

A beautiful ornamental shade tree with vigorous growth. Our strain is much superior to common mimosa growing around here as we propagated from original trees imported

years ago from Japan after careful selection. Its flowers are larger in size and brighter red in color.

	Each	10	100
4-6 inch, S.			1.00
6-8 inch, S.			1.50

AMYGDALUS, (Double flowering Peaches)

Large double flowers in profusion covering the entire plant early in spring. We offer here three different colors, pink, red and white, on plum stock.

12-18 inch, G.10	.80
18-24 inch, G.15	1.25
2-3 feet, G.20	1.50

CYTISUS SCOPARIUM (Scotch Broom)

A graceful flowering shrub with golden yellow pea-shaped flowers. Stems remain green all year.

6-8 inch, C., from 2½ inch pot75	6.00
3-4 feet, Specimens, B&B	1.00	
4-5 feet, Specimens, B&B	1.50	

GINKGO BILOBA (Maiden Hair Tree)

A graceful shade tree with rapid and erect growth. Considerable number of the plants planted in Washington.
D. C.

4-6 inch, S.50	3.00
6-8 inch, S.65	5.00

IDESIA POLYCARPA

Desirable shade tree, growing in height about 25 feet. Leaves very large, heart shaped with long red stems. It is attractive color contrast of green leaves with red stem. At fall it turns yellow to red color. Very rapid grower.

2-3 feet, S. T.75	5.00
3-4 feet, S. T.	1.25	10.00

LAGERSTROMIA INDICA (Crape Myrtle)

One of the most favorite flowering shrubs of the south. Hardy and heavy bloomer for long period. It paints landscape in summer with its brilliant blossoms in tones of many different shades, being called "Southern Lilac." Crimson, white, lavender and dark red.

12-18 inch, C.	1.00	8.00
18-24 inch, C.	1.25	10.00
2-3 feet15	
3-4 feet20	
4-5 feet30	
5-6 feet50	

LESPEDEZA FORMOSA (Pink Flower)

Purple bush clover, half shrub. Long arching branches growing usually about three feet. Rosy purple pea-like flowers in long drooping cluster. Blooms twice in a year, spring and fall in the South. Very useful plant for border

12-18 inch, S.50	3.00
18-24 inch, S.60	4.00

LESPEDEZA JAPONICA (White Flower)

Pure white flower and much larger growth than purple flowering species. It is surely pretty sight when blooming.

	Each	10	100
Small clump, 3-5 eyes50	3.00
Medium clump, 5-10 eyes75	5.00

ORIENTAL MAGNOLIA

Although not known much in the South, Oriental Magnolia is most highly esteemed by Northern and Eastern gardeners. It is most beautiful flower in early spring.

MAGNOLIA LILIFLORA

Flower of lily-shape in dark purple at outside and creamy white at inside of petal. It blooms before leaves come, a little later than M. Soulangeana.

M. SOULANGEANA NIGRA

Very similar to M. Liliflora, except the color, which is much darker on both sides, in and out.

PRICE ABOVE TWO VARIETIES

2½ inch pot, C.	2.00	17.50

M. SOULANGEANA

Chinese Saucer Magnolia. Flower white with rosy pink at base of petals. It blooms in profusion before leaves appear. This is most popular varieties.

M. SOULANGEANA LENNEI HYBRID

Cross hybrid of M. Soulangeana to M. Liliflora. Character of growth similar to Liliflora. Leaves roundish and much thicker. Flower has nine petals instead of six of Liliflora or Nigra. Much larger flower with dark purple color.

PRICE ON ABOVE TWO VARIETIES

2½ inch pot, Cutting grown	2.50	20.00
8-12 inch, C., TT	3.00	25.00
12-18 inch, C. TT.	4.50	40.00
18-24 inch, C., B&B	1.00	9.00
2-3 feet, B&B	1.25	10.00
3-4 feet, B&B	1.75	
4-5 feet, B&B	2.50	

M. STELLATA

Dwarfish growth and much smaller leaves. Flower small star shape, delicate pinkish white.

M. DENUDATA HYBRID

Grows to tree, 25 to 30 feet. Flower much larger than M. Soulangeana, 9 petals. Color ranged from white with pink to almost white. Leaves roundish and very large. One of best Magnolia. (We have only small sizes in limited supply)

2½ inch pot, Cutting	3.50	30.00
----------------------------	------	-------

MALUS (Flowering Crab)

Very beautiful and useful flowering shrubs. We recommend especially strong to Southern gardeners to use this kind flowering shrub among stiff evergreens.

MALUS EXCELENCA (Weeping Pink)

M. FLORIBANDA (Single Pink)

M. NIEDZWETZKYANA (Red)

M. SPECTABILIS (Double Pink)

	Each	10	100
18-24 inch, G.15		
2-3 feet20		
3-4 feet25		

PRUNUS JAPONICA (Flowering Almond)

This is very rare in this country. Immense single pink flowers in spring, being followed by abundant fruits, shape and flavor of which is similar to commercial cherry, but smaller in size. Dwarf in nature. Planting among evergreen shrubs most desirable effects can be given.

6-8 inch, C. T.50	4.00
----------------------	-----	------

PRUNUS PISSARDI (Purple Leaf Plum)

3-4 feet, grafted on plum stock20
4-5 feet, grafted on plu mstock30

ROSA ROULETTI

Known as "Rocky Rose", one of the newest novelties as it blooms in height of several inches. The tiniest of its family ever known. Most suitable for miniature or rock gardens.

2-4 inch, 2½ inch pot	1.25	10.00
4-6 inch, 3 inch pot	2.00	17.50

SPIREA REEVENSIS PLENO

3-4 feet25
4-5 feet35

VINES AND CLIMBERS

BIGNONIA SPECIOSA

Evergreen vine with large purple trumpet shaped flower.
12-15 inch, C., 2½ inch pot

1.00 8.00

BOUGAENVILLEA, CRIMSON LAKE

The best or Bouganvillea. Very rich brilliant crimson-like color and more profuse bloomer than any other variety. Florists grow it in pot for holiday trade, while in Southern Florida and Southern California raised outside for climbing vine.

	Each	10	100
4-6 inch, 2¼ inch pot90	7.00
6-10 inch, 3 inch pot		1.50	12.00
10-18 inch, 4 inch pot		3.00	25.00

CLEMATIS PANICULATA

(Sweet autumn clematis). Very fragrant, white star-shaped flowers produced in profusion during summer and fall on long shoots.

3-year, S.	1.00	8.00
-----------------	------	------

EUONYMUS RADICANS (Winter Creeper)

A fine evergreen creeper with small shiny green foliage. Very hardy.

12-18 inch, C. T.75	6.00
------------------------	-----	------

EUONYMUS RADICANS VARIEGATA

Similar to the above but with foliage beautifully variegated in green and creamy white.

4-8 inch, 2½ inch pot90	7.00
-----------------------------	-----	------

EUONYMUS KEWENSIS (Baby Winter Creeper)

Slender thread like vine with very tiny green foliage. One of the cutest creepers in existence. Suitable to covering stumps and rock piles and very plant for miniature garden.

4-6 inch, 2½ inch pot90	7.00
-----------------------------	-----	------

FICUS REPENS (Climbing Fig)

Though it is not very hardy, one of the best climbers, if not the best, known in the South, to cover stone or brick walls as well as rocks.

12-18 inch, 2½ inch pot90	7.00
-------------------------------	-----	------

HEDERAHELIX (English Ivy)

We have two kinds of stock. One big leaved and the other small. Specify when you order which one you prefer.

8-12 inch, 2½ inch pot75	5.00
12-18 inch, 3 inch pot90	7.00

KADZURA VINE

Evergreen trailing viney plant with thick leathery foliage which is dark glossy green. Flower is whitish rose, when clusters of scarlet berries ripen in autumn contrast with the dark green lustrous persistent leaves present a most attractive effect.

12-18 inch, C., 2½ inch pot90	7.00
-----------------------------------	-----	------

MITCHELLA REPENS (Comonly Called "Partridge Berry")

This little native plant is a beauty of all seasons. Beginning its show with slender trailing stems covered with tiny green foliages, small white or flesh colored

flowers with pleasant odor, peeping under the leaves at April and May is undoubtedly cutest view. Still better display can be seen, however, in winter time when bright red berries appear to the scene to accomplish its grand show. This is an ideal plant for miniature or dish garden.

	Each	10	100
2¼ inch pot75	5.00

TRACHELOSPERUM JASMINOIDES (Star Jasmine)

Finest vine to cover arbor, pagoda or screen. Leaves roundish oval, thick shiny green. Star shaped white flower very fragrant. Grand is the view when fully bloomed. If properly trained this is better pot plant than English Ivy.

12-18 inch, C., 2½ inch pot90	7.00
-----------------------------------	-----	------

TRACHELASPERUM JASMINOIDES, (Yellow flowering)

6-8 inch, C., 2¼ inch pot90	7.00
---------------------------------	-----	------

VINCA VARIEGATA

Excellent for vases, rock work and bordering slope.

12-18 inch, from 2½ inch pot75	5.00
------------------------------------	-----	------

WISTERIA MULTIJUGA (Purple Flowering)

WISTERIA CHINESE ALBA (White Flowering)

3-year old, grafted50
---------------------------	-----

WISTERIA MULTIJUGA ROSEA (Pink)

Very rare variety. Clear pink to light pink, Raceme very long, it reaches very often over two feet. Vine grows very vigorous.

2-year old, grafted50
3-year old, grafted75

PALMS, GRASSES and MISCELLANEOUS

CHAMEROPS EXCELSA

18-24 inch, Field, B&B75
2-3 feet, Field, B&B	1.00

COCOS AUSTRALIS (Pindo Palm)

One of the hardiest palms with its graceful shape with grayish green, curved pinnate leaves.

8-12 inch, S.75	6.00
12-18 inch, 3-year old	1.00	8.00

COCOS ERIOSPATHA

Hardest palm of this sort. Resembles very much to Cocos Australis.

8-12 inch, 2-year old75	6.00
-----------------------------	-----	------

OPHIOPOGAN JAPONICA (Blue Grass)

Dwarf evergreen grass, thrives well in shady place where no other plants can grow.

	Each	10	100
Small division40	2.00
Medium division50	3.00

OPHIOPOGAN JABURAN AUREA VARIEGATA

A most beautiful and useful plant as house plant, also as border outdoor in the South. Its deep violet-blue flowers freely produced in dense spike nearly all summer are inevitable. Deep blue berries about the size of currants show excellent contrast to the drooping broad grass-like leaves striped with green and creamy white.

Medium clump	3.00	25.00
--------------------	------	-------

CORTADERIA AGENTEA (Pampas Grass)

Silvery, plume-like spikes of flowers. An old favorite for grouping on the lawn. We can supply both silver and pink varieties.

Small division75	6.00
Medium division	1.25	10.00

IRIS PSENDACORUS (Yellow Isis)

2-year blooming size75	5.00
1-year50	3.00

IRIS KAEMPFERI

1-year, selected25	1.50
------------------------	-----	------

FUNKIAS VARIEGATA
